

LTC Heel Lift Wedge

To aid with the recovery of heel pressure ulcers, this product was designed to not only elevate the heel away from pressure, but also keep the legs separated and secure, within the leg troughs.

The heel lift is ideal for anyone who spends prolonged periods in bed, and helps with both the recovery and prevention of heel skin tissue break down. This wedge also helps minimize leg turn-out, by securely holding the legs in the leg shaped troughs.

When ordering this product, please include leg length measurements in order for proper fitting.

Features and Benefits:

- Aids with the recovery of heel pressure ulcers
- Helps with both the recovery and prevention of heel skin tissue break down
- Minimizes leg turn-out
